ON THE ROAD SINCE 1967...

HERITAGE AND HISTORY

In 1967 Boydell and Jacks was the first company in the world to conceive and produce a commercial vehicle fender from thermoplastic.

Remaining a family business for the past 53 years, we have been at the forefront of design and innovation, gaining an enviable reputation as a company more than willing to collaborate with our customers to help achieve their objectives.

1988 saw Boydell and Jacks become the first fender manufacturing company to be accredited with the UK quality assurance standard BS 5750 and thus becoming a BSI registered company. The original accreditation was maintained and over time a system has developed into BS EN ISO 9001-2008.

Our Featherwing branded products have become synonymous with quality and reliability, and have been adopted by many OE truck manufacturers, including such companies as Volvo, Paccar, Scania and many prestigious Semi Trailer manufacturers and body builders throughout the UK, Europe and worldwide.

Featherwing branded products are being specified and fitted by prestigious companies such as Ryder, DHL, TNT, XPO Logistics and UPS.

COMPANY VISION

Here at Boydell and Jacks, our core competence is in the high quality manufacture and distribution of the "Featherwing" range of components for the commercial vehicle industry. Our aim is to provide functional and innovative products, inspiring trust from our customers. We strive to do business with integrity and in an uncomplicated manner, delivering value and service at all times. Our staff are aware of the importance of all customers, and are empowered to embrace new technology and working practices in their pursuit to exceed expectations.

ENVIRONMENTAL POLICY

Boydell and Jacks believe that businesses are responsible for achieving good environmental practice and operating in a sustainable manner.

We are therefore committed to reducing our environmental impact and continually improving our environmental performance as an integral and fundamental part of our business strategy and operating methods. It is our priority to encourage our customers, suppliers and all business associates to do the same. Not only is this sound commercial sense for all, it is also a matter on delivering on our duty of care towards future generations.

FEATHERWING SPRAY SUPPRESSION TECHNOLOGY AS STANDARD... POLY QUARTER FENDERS

- Advanced integrated anti-spray system
- The **ONLY** quarter fender that channels road spray away from the tire
- Increases driver visibility and safety
- Increases other road users' safety
- Pre-drilled for easy fitment
- Unique multi positioning mounting tube fitting option
- Allowing standard, low or custom mount to your truck
- Injection molded
- Available in black or silver
- Color stabilized with UV additive for resistance to fading
- Excellent heat and cold crack properties

"The **ONLY** quarter fender to give you 'away from the tire' integrated anti-spray technology and a 'unique' integrated multi position mounting tube option."

All design rights and patents applied for.

QF615KIT-BLACK

Includes:

- 2 - Black quarter fenders with advanced integrated anti-spray
- 2 - E-coated black, 18 gauge carbon steel mounting tubes, with poly end caps fitted
- 2 - Zinc plated tube clamp
- 2 - Black poly top flap
- Zinc plated hardware
- Installation guide

Advanced integrated anti-spray molded in.

ON THE ROAD SINCE 1967... POLY SINGLE AXLE FENDERS

The Original Fender Crush Test

**Featherwing fenders are tough,
and always have been since 1967.**

HOW TOUGH?

The photos below are taken from our very first catalogue in 1968. They show company founder, Mr Ray Jacks, and Engineer, Mr Tom Kennedy, inspecting an early Featherwing Poly Fender, after a very basic, but 'stylish test'.

Rest assured, with Featherwing fenders you have over 53 years of heritage, expertise and knowhow in every Fender we produce. You can't get that from anywhere else!

TOUGH IN 1967, STILL TOUGH 53 YEARS LATER...

Featherwing
